InstallCard

Zmodo systems come with an InstallCard that offers the option for you to hire a third-party installation company to install the security cameras for you.

The card will instruct you to go to www.zmodo.installcard.com and enter the card number.

Once you enter the number, you will be asked some questions regarding where you live, which system you purchased, where you want the DVR, how you would like to view it, where each camera will be mounted, and if you need the wires concealed.

After you complete the questionnaire you will be informed that the card is now active and that pricing is not yet available online, and you will receive an email. An InstallerNet representative will call you within 2 business days with a quote and to schedule an installation time.

You can also contact support@installernet.com with any questions or issues about this service.
