Reset Zsight Account Password

If you are unable to login to the original account because you forgot the password, you can reset that password through Zsight. On the login screen, choose the bottom option “Forgot Password?” and then input the email address for that Zsight account.

Manuals

The screenshot shows a mobile application interface for logging in. At the top, there is a dark navigation bar with a back arrow on the left and the text "Log In" in the center. Below this bar, the main content area has a light gray background. It contains three primary elements: an email input field with the text "support@zmodo.com", a password input field with the placeholder text "Password", and a prominent blue button labeled "Log In". At the bottom of the form, there are two links: "Sign up" in blue text and "Forgot password?" in blue text, which is highlighted with a red rectangular border.

Then you should receive an automated email from meshare@meshare.com with a link to reset that password. If you don't see the email, check your spam folder. Also, if this link does not open properly in the mobile phone browser, open the link from a PC browser.
