## CM-Z2213GY Dome Settings Menu

Main Menu

- Dome Settings
  - Language: English, Chinese
  - TV Standard: NTSC, PAL (Changing the TV Standard to PAL shifts the Menu down on the screen but does not render the camera useless.)
  - Dome Title: Can be up to 8 characters long
  - Comm Settings: (The CM-Z2213GY has automatic addressing so changing the Comm Settings does not do anything as the camera does not allow the user to save the settings)
  - Restore Defaults: Restores the cameras default settings. (Three dots will blink for several seconds and then return to the Dome Settings menu.)

Below is the Dome Settings Menu:
