## ZP-NB14 Adjusting camera layout

If the camera layout on your display is not in an order that you like, you can switch the cameras to specific channels. For example, you'd like the video from channel 1 switched with the video from channel 3.

Open the main menu and select "DEVICE MANAGEMENT"

Next, from the list on the left, click on "ADD DEVICE"

(this is usually the default when you open the device management menu)

## ZP-NB14

	Device Management								
Add Device									
Video Stream Settings	Search and Add All Devices Automatically								
Video Mask	Protocol	P Se	arch for Devices						
	Channel	IP Address	MAC Address	Protocol	Status				
	01	192.168.1.204	04:5c:06:02:83:9d	ZSP	Online				
	02								
	03	2							
	04								
	Auto Add	Add Device Manually		Refresh	Delete Device				

Here you can copy down the IP addresses and see which channels thay are currently connected to. Select the camera you wish to change using the box under "channel" and delete the cameras as needed. You can then select "ADD DEVICE MANUALLY"

	Device Management						
Add Device							
Video Stream Settings	Search and Add	d All Devices Automatically					
Video Mask	Protocol ZSP	Sea	arch for Devices				
	Channel	IP Address	MAC Address	Protocol	Status		
	01	Add	Online				
	02						
	03	Address	_				
	04		_				
	Auto.	Port 8000			elete Device		
	Auto.				elete Device		
		Save		ancel			

You can enter the IP address of the camera you wish to add in the order that you want them to be listed. Although you can not directly select which channel the camera will connect to, the system will order them starting with channel 1. Unique solution ID: #1354
