P2P Systems - Notification Icon Explained

The new simplified P2P system has a notification icon in the menu bar when motion is detected. The notification icon looks like this:

Clicking on the notification icon will take you to the video playback page and start playing the latest video recorded that includes movement.

The screenshot displays a video playback interface. The main video window shows a hallway with a red brick wall and a white door. The timestamp in the top right corner of the video is 17-02-2014 15:23:12. Below the video is a playback control bar with buttons for play/pause, stop, and full screen. At the bottom of the interface is a channel selection bar with 25 channels (CH 0 to CH 24) and a legend for event types: All Records (blue), Schedule (green), Alarm (red), Motion (orange), and Manual (cyan). On the right side, there is a control panel with a channel selector (CH 01, 02, 03, 04), a calendar for February 2014, an event filter (ALL), a time range selector (00:00-06:00), a search button, and a table with columns for No., Start - End Time, and Size. A Backup button is located at the bottom right of the control panel.
