P2P Systems - Notification Icon Explained

The new simplified P2P system has a notification icon in the menu bar when motion is detected. The notification icon looks like this:

Clicking on the notification icon will take you to the video playback page and start playing the latest video recorded that includes movement.

The screenshot displays a video playback interface. The main area shows a camera feed of a hallway with a red brick wall and a glass door. The timestamp '17-02-2014 15:23:12' is visible in the top right corner of the video. Below the video are playback controls: a play button, a stop button, and a full-screen button. To the right of the video is a control panel with a channel selector (CH 01, 02, 03, 04), a calendar for February 2014, an event filter (ALL), a time range selector (00:00-06:00), and a search button. Below these is a table with columns for 'No.', 'Start - End Time', and 'Size'. At the bottom of the interface, there is a legend for event types: All Records (blue), Schedule (green), Alarm (red), Motion (orange), and Manual (cyan). A 'Backup' button is located in the bottom right corner.
