## How to set up ESEE mobile app

To set up the ESEE mobile app for your ZMD-DT-SFN6 DVR system, first install the app

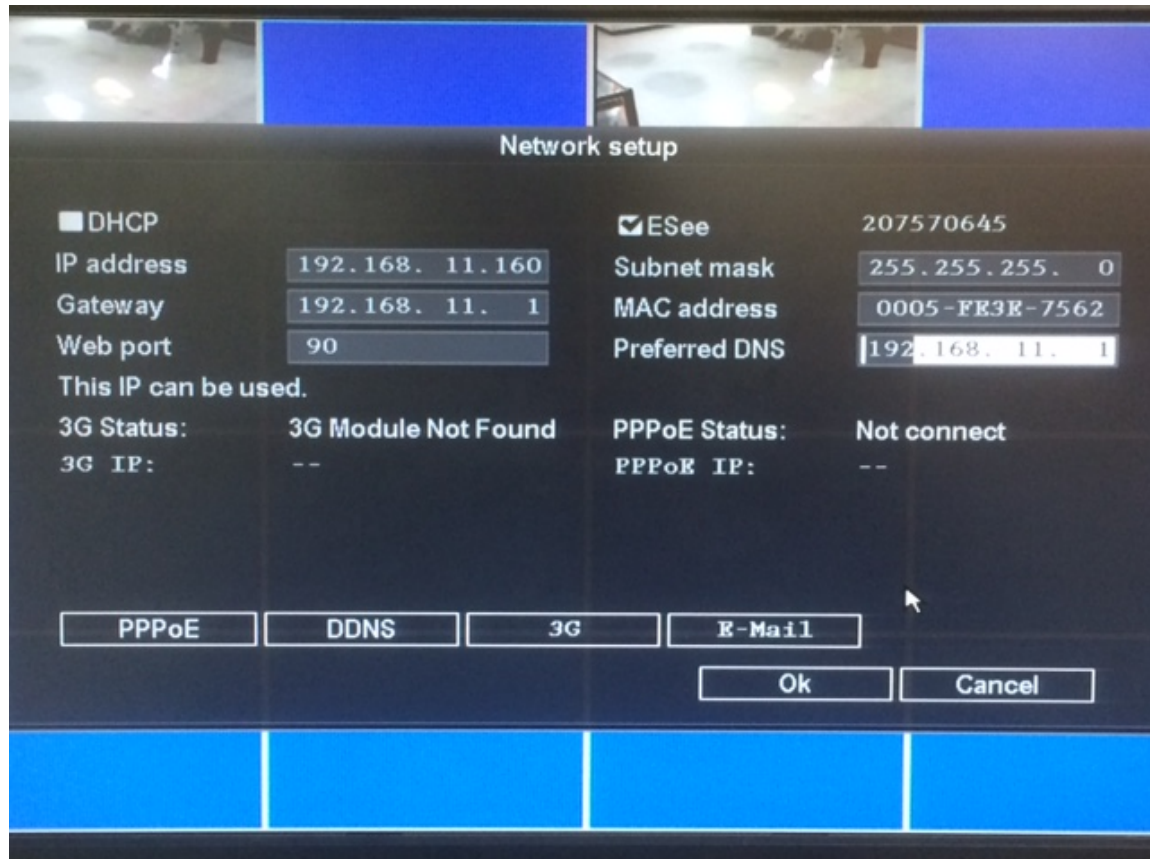

You can program the app using the ESEE ID (found on the DVR's network setup page) or by it's IP address and port, just tap the option you would like to use.

The image is a screenshot of the ESEENET mobile app's setup screen. At the top, there is the ESEENET logo. Below it, there are two tabs: 'ESee ID' and 'Address'. The 'Address' tab is selected. The screen contains several input fields: 'Address:' with an empty text box, 'Port:' with a text box containing '88', 'User ID:' with a text box containing 'admin', and 'Password:' with a text box containing six dots. Below these fields is a 'Max Channel:' section with five radio button options: '1', '4', '8', '16', and '32'. The '16' option is selected. At the bottom of the form is a blue 'Login' button.

We recommend programming the system using the network ID. This is found at the top right on the network setup page in the DVR's network settings menu.
