

Cloud based DVR/NVRs

Reset Zsight Account Password

If you are unable to login to the original account because you forgot the password, you can reset that password through Zsight. On the login screen, choose the bottom option “Forgot Password?” and then input the email address for that Zsight account.

Cloud based DVR/NVRs

The image shows a mobile application interface for logging into a cloud-based DVR/NVR system. At the top, there is a status bar with various icons and the time 3:13 PM. Below this is a dark header with a back arrow and the text 'Log In'. The main area is light gray and contains two input fields: the first is for an email address, with 'support@zmodo.com' entered and highlighted by an orange border; the second is for a password, with the placeholder text 'Password' and highlighted by a gray border. Below the password field is a blue 'Log In' button. At the bottom, there are two links: 'Sign up' and 'Forgot password?', with the latter highlighted by a red border.

Then you should receive an automated email from meshare@meshare.com with a link to reset that password. If you don't see the email, check your spam folder. Also, if this link does not open properly in the mobile phone browser, open the link from a PC browser.
