## **The Date on My DVR Always Reads 1-1-2000**

If the date on the DVR always reads January 1st, 2000 even if you set the DVR to a different date, this indicates that the DVR has experienced an internal power surge which effects its ability to save settings correctly.

Unfortunately, there is currently no way to fix this issue. If your DVR experiences this problem, please contact Zmodo technical support so that we can replace the DVR under warranty.
