

ZMD-DT-SFN6

How to set up ESEE mobile app

To set up the ESEE mobile app for your ZMD-DT-SFN6 DVR system, first install the app

You can program the app using the ESEE ID (found on the DVR's network setup page) or by it's IP address and port, just tap the option you would like to use.

The image shows the ESEENET mobile app setup screen. It features a blue header with the ESEENET logo. Below the header, there are two tabs: "ESee ID" and "Address". The "Address" tab is selected. The screen contains several input fields: "Address:" (empty), "Port:" (88), "User ID:" (admin), and "Password:" (masked with dots). Below these fields is a "Max Channel:" section with buttons for 1, 4, 8, 16, and 32. The "16" button is highlighted. At the bottom, there is a blue "Login" button.

We recommend programming the system using the network ID. This is found at the top right on the network setup page in the DVR's network settings menu.
