CM-I11123BK / CM-I12316GY - Wifi Setup Guide

The CM-I11123BK and the CM-I12316GY share the same software and the same setup instructions. Before starting the setup, please make sure that your camera powered on and plugged into your router with the included ethernet cable.

1. Install the search tool from the included software disc. If you do not have the software disc, you can download it from: [HERE](#)
2. Open the search tool and click "Search". It should find the camera at it's default IP of 192.168.1.99

The screenshot shows a window titled "Search Tool" with a green header bar. Below the header is a search bar and a language dropdown set to "auto select". A table displays search results with columns: device name, device m..., number of ch..., IP address, data port, web port, and ID. The first row shows "encoder", "1", "192.168.1.99", "99", "99", and "00C6FB005D33". Below the table are input fields for "IP address" (169 . 78 . 32 . 56) and "Port" (99). At the bottom are buttons for "search", "open device", "modify settings", and "upgrade". On the right, there is a "local IP address" dropdown set to "Any(0.0.0.0)" and a "total devices" counter showing "1".

device name	device m...	number of ch...	IP address	data port	web port	ID
encoder	1		192.168.1.99	99	99	00C6FB005D33

3. Highlight the camera in the search tool and click "Modify Settings".
4. Put a check next to "Enable DHCP", type "admin" into the box next to username, and then click "OK".

network settings

device model: encoder

device name:

number of channels: 1

ID: 00C6FB005D33

enable DHCP: ☒

IP address: 192 . 168 . 1 . 99

subnet mask: 255 . 255 . 255 . 0

gateway: 192 . 168 . 1 . 1

data port: 99

web port: 99

DNS IP address: 172 . 18 . 16 . 1

multicast IP address: 255 . 255 . 255 . 255

multicast port: 0

Username: admin

Password:

Restart after change is saved

OK Cancel

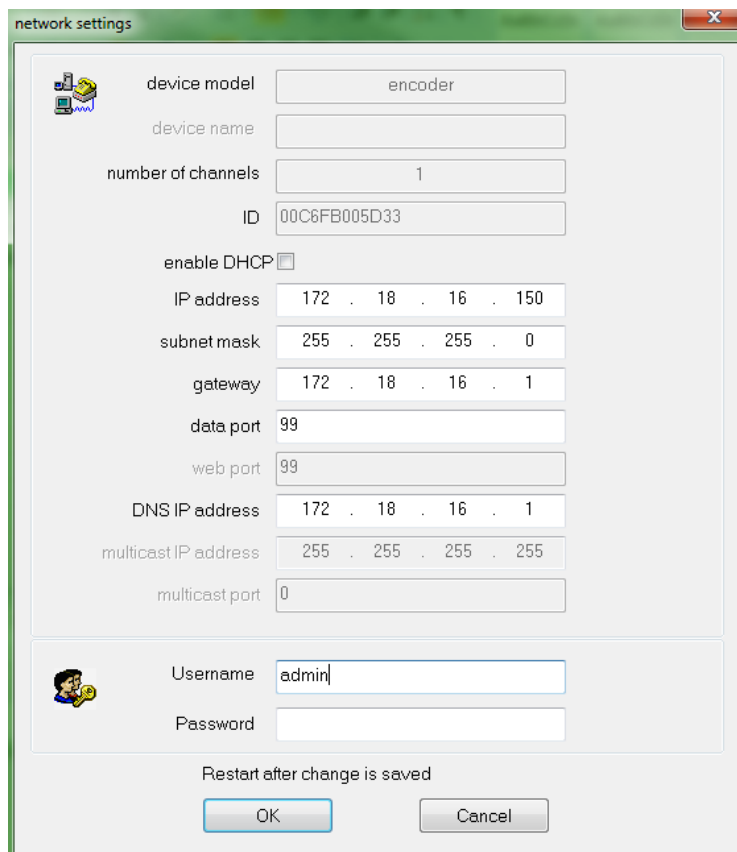

5. After clicking OK, the camera will tell you "change is saved".

6. Wait for 1 minute then hit "Search". Highlight the camera, and click "Modify Settings" again.

7. Uncheck "Enable DHCP" and find the IP Address. Add 50 to the last number in the set. For example, if your IP says 192.168.1.23, change it to 192.168.1.73. Type the username "admin" in and click "OK".

CM-I12316GY

The 'network settings' window displays the following configuration:

- device model: encoder
- device name: (empty)
- number of channels: 1
- ID: 00C6FB005D33
- enable DHCP: ☐
- IP address: 172 . 18 . 16 . 150
- subnet mask: 255 . 255 . 255 . 0
- gateway: 172 . 18 . 16 . 1
- data port: 99
- web port: 99
- DNS IP address: 172 . 18 . 16 . 1
- multicast IP address: 255 . 255 . 255 . 255
- multicast port: 0
- Username: admin
- Password: (empty)

Restart after change is saved

Buttons: OK, Cancel

8. Wait for approximately 1 minute, and click "Search" again.
9. Highlight the camera in the search tool and choose "Open Device". This will open the camera in Internet Explorer.
10. Type in the username "admin" and click "OK" to login. There is no password by default.

The Windows Security dialog box displays the following information:

The server 172.18.16.150 is asking for your user name and password. The server reports that it is from ipcamera_00C6FB005D33.

Warning: Your user name and password will be sent using basic authentication on a connection that isn't secure.

Fields:

- User name: (empty)
- Password: (empty)
- Remember my credentials: ☐

Buttons: OK, Cancel

11. Click "Sign in" under "ActiveX Mode (For IE Browser)"

12. Internet Explorer will now install the add-on. Accept or allow any prompts to install software at this point. If it doesn't work, you may need to configure your ActiveX controls as explained: [HERE](#)

13. Click the "Settins" icon in the bottom right of the page.

14. In the column on the right hand side, choose "Wireless Lan Settings"

15. Click the "Scan" button 2-3 times. Your wireless network should show up in the list.

Wireless Lan Settings	
Wireless Network List	TestWiFi[4e00b8a38650] infra WPA/WPA2-PSK
	CallCenter[000050465d6c] infra WPA/WPA2-PSK
	<input type="button" value="Scan"/>
Using Wireless Lan	<input checked="" type="checkbox"/>
SSID	TestWiFi
Network Type	Infra
Encryption	WPA2 Personal (TKIP)
Share Key	testingcam
	<input type="button" value="Submit"/> <input type="button" value="Refresh"/>

16. Type your WiFi password in the "Share Key" field and then click submit. The screen will change and start a 30 second countdown. Remove the ethernet cable with 20-25 seconds left.

The device is rebooting. Don't shutdown it's power. Please waiting ... 28

CM-I12316GY

17. After the countdown is complete, wait another 10-15 seconds and hit Search in the tool again. If the camera is detected, your camera is now on wireless and you can put the camera where you would like.

18. To set up recording, we recommend using the software ISPY and it can be located: [HERE](#)
