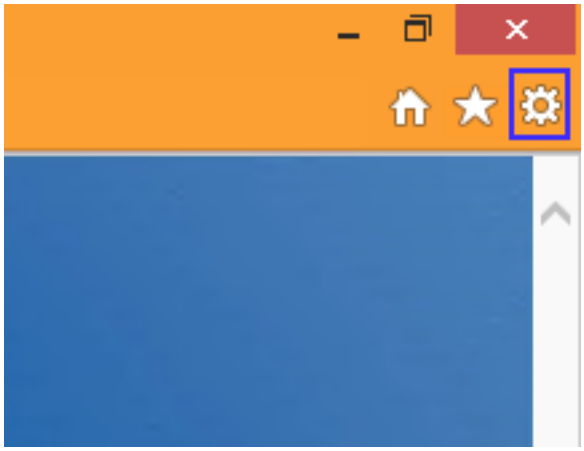
Adding your device to the Internet Explorer Compatibility View list

**Internet Explorer 11 Keeps Crashing When I Login **

With the release of Windows 8.1, Internet Explorer was upgraded to version 11. This new version has caused some compatibility issues with some Zmodo Add-ons.

Many of our will require using "Compatibility View" to work. Use the following instructions to enable compatibility view.

1. Click the icon that looks like a cog or gear in the top right.



2. Click "Compatibility View Settings"
